## Important Notes About These Notes

These notes were written by me, Mark Ormesher, during my revision for Computer Science exams at King's College London. I am publishing them here to help my classmates and other students in the years below me. To the best of my knowledge they are correct.

- These notes are **not endorsed** by King's College London, the module lecturers, or any member of College staff.
- These notes are **not checked** by any qualified individual, and I offer no guarantee as to how accurate or complete these notes are. They are offered for free, as-is, and I accept no responsibility for how you choose to use them.
- These notes were relevant for my year (2016/17) but **the content for your course may be different**. Check your lecture slides, syllabi, tutorial guides, etc.
- These notes were produced for my own personal use (it's how I like to study and revise). That means that some annotations may be irrelevant to you, and some topics might be skipped entirely.
- Feel free to **share** these notes, however please only share a link to the repo (see the link below), not individual files.

Notes are originally from <https://github.com/markormesher/CS-Notes> and remain the copyright-protected work of Mark Ormesher.
